

How To Find Out In Mathematics: A Guide To Sources Of Information

In-Text citation with MLA

MLA style calls for two kinds of information to be included in in-text citations:

1. The **author's** last name
2. The **page number** for the reference

All of these pieces of information must match the corresponding reference list entry exactly!

Example in-text citations, from fictional authors and sources:

While all flies provide sustenance, one obtains more "nutrition for the soul" from high-quality specimens **(Frog 56)**.  Make sure the period goes after the parentheses!

You could also place part of the citation in the text as follows:

While all flies provide sustenance, **Ribbet Frog** argues that one obtains more "nutrition for the soul" from high-quality specimens **(33)**.

In this example, the author's name is already mentioned in the text itself; therefore, the name need not be repeated in the bracketed citation.

How to Find Out in Mathematics: A Guide to Sources of Information, Second Revised Edition presents updated topics about probability and statistics, dictionaries. This guide provides links to research information sources for you will need to find information about previous publications in your research. This guide provides information about Mathematics resources. Check out the links below for more ways to ensure that your Web sources are appropriate for. Check the rest of this subject guide carefully for additional subject The Internet can be a rich source of information but not everything will be. Learn to scrutinise your sources - check their validity and relevance. Real- World Maths Introduction to Geometry. SUB- Primarily you need to be aware of where to look for information, how to access it and how to use it. . you should check what your institution's guidelines are for using internet sources in your work. A guide to finding information in mathematics and statistics. Includes links to key resources and sources of help. One of a series of subject information gateways forming part of Academic Info, a directory of Each subject guide is an annotated listing of the best general Internet sites in the field, as well as. This guide is intended to help students in Discrete Mathematics (MATH W) find books on proofs and proof writing, information sources on discrete Please visit the Mathematics Research Guide for more sources of books.
